

Good

Rivenergy plumbing is designed to lower the system head pressure and friction loss for increased water flow and chemical distribution. Designed to lower electrical, heating and chemical costs.

**System Components**

- Minimum four surface returns with Venturi Eyeball Fittings for deep heating and improved circulation
- Optional fifth floor return "Deep Heat" for more efficient heating and water distribution
- Sweep fittings on pressure pipes lowers head pressure, increasing water flow
- Optional Quik Skim for unscreened pools

The ultimate enhancement to any automatic pool cleaner

Better

This advanced circulation system, combined with our standard Rivenergy Circulation system, effectively delivers heated, chemically treated filtered water evenly throughout the pool's entire water column, drastically improving efficiency.

**System Components**

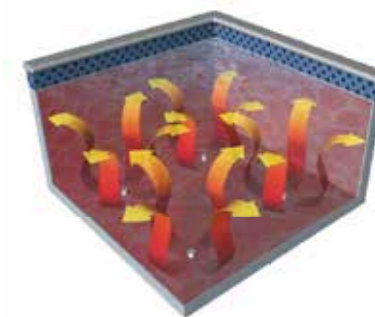

- Anti-Vortex Single Channel Drain (AVSC)
- Minimum four surface returns with Venturi Eyeball Fittings for deep heating and improved circulation
- Tsunami Water Actuator Valve
- Three G4V HP cleaning heads
- Optional Quik Skim and Leaf Vac Canister for unscreened pools

G4V

Venturi Eyeball Fittings for deep heating and improved circulation

QuikFresh Circulation  
Efficiently re-circulates sanitized, heated, filtered water throughout the pool floor.

Best

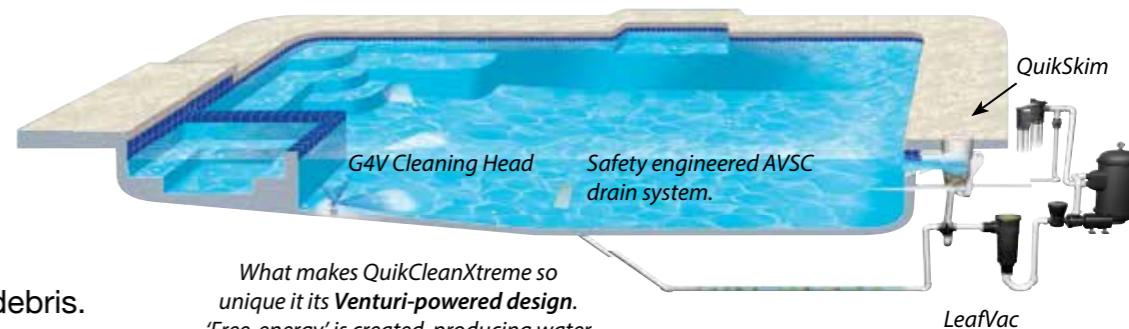

**In-Floor Cleaning and Circulation**

This is the most effective way to deliver heat, water and chemicals throughout the entire pool. Combines with our standard Rivenergy Circulation system, it hydraulically brushes the entire pool and removes heavy debris.

**System Components**

- Anti-Vortex Single Channel Drain (AVSC)
- Tsunami Water Actuator Valve
- G4V HP Cleaning Heads (full system)
- Optional Quik Skim and Leaf Vac Canister for unscreened pools

What makes QuikClean Xtreme so unique is its Venturi-powered design. 'Free-energy' is created, producing water flow surpassing in volume by many times the volume of flow invested.
